***The impact of global financial crisis on French and UK  
banking systems***

by R. Medikou

**Abstract:** The present work presents the impact of the global financial crisis on French and UK banks. A recent report by Fitch Ratings points out that French and UK banks will run exploratory 30-year climate-change scenarios set out by the Bank of France and the Bank of England in 2021 and 2022. Our model makes use of these 2 exercises.

**Key words:** financial crisis, French and UK banking system, decision making, early-warning system.
