Response of EU firms investments to uncertainty

by K.Lagiou

Abstract: The present work deals with the effect of uncertainty on investment. We employ a dataset of 6000 European firms' balance sheets for 8 years covering the period before and after the eurozone crisis. Focusing on the response of investment to uncertainty, it emerges that relative smaller firms are affected more compared to larger ones.

Key words: financial crisis, small firms, investments, uncertainty, EU economy.
